

For release to Journalist and the Financial and Business sector

BioSpec Global Solutions Inc, takes delivery of new TOG's 3000 Home edition for the U.S. and international markets.

New York, Montreal , February 1, 2010 –**ICBS Ltd. (OTCPK: [ICBT](#))**, announced today that it has taken delivery of the new **TOGS™ 3000** bio-photonic incubation & detection systems, which the company will be marketing in the U.S. and overseas. The **TOGS™ 3000** has 100% accuracy in the detection of **Total Coli forms and E. Coli** bacteria in water.

“BioSpec Global Solutions will be moving to introduce the new TOGS™ 3000 in the U.S, and overseas.” said Don Saunders, President and CEO. “ Given the advantages on processing time (24 hours) plus the accuracy of these machines, (100%) , can equip people with the technology needed to insure safe drinking water .”

The **TOGS™ 3000** has been verified by Ryerson University, Agriculture Canada and Saskatchewan Department of Health. It has been accepted for use for drinking water analysis by EPA in the USA when used in conjunction with our EPA approved reagent and method,. The **TOGS™ 3000** has been used in a research project by the World Health Organization in Hawaii and by OCETA in India. Agents and distributors are being established to set up a global marketing network. Further verification and validation studies will be done shortly by users and ETV (Environmental Technology Verification) for microbial quantification for beach and wastewater applications.

The timing for commercialization is excellent. The World Health Organization has declared ``safe drinking water is a human right ``and the United Nations is struggling with its mandate to protect drinking water quality in over 100 million wells worldwide. Governments of the world are being pressured to conform to these directives. World pressure on China over food and water safety is presently a good example of that. BioSpec Global Solutions is currently in talks with a Chinese distributor.

The company holds worldwide patents on the **TOGS™ 3000** and **TOGS9000 .™**
