

For release to Journalist and the Financial and Business sector

BioSpec Global Solutions Inc., to target major food manufacturing companies, to eradicate the possibility of undetected E.coli contamination of fresh produce.

New York, Montreal , November 13, 2009 **BioSpec Global Solutions Inc.**, and partner –**ICBS Ltd. (OTCPK: [ICBT](#))**, announced today that the company will be targeting major food producers in the U.S. and Canada for the use of the TOG'S 9000™ which has proceeded in the development of Antibody/antigen multiple discrete optical system (AMUDOS) for the simultaneous analysis of E.coli, in fresh produce.

“We have seen the disastrous results of food contamination by E.coli in fresh vegetables and packaged salads in the past” said Don Saunders President and CEO of BioSpec Global Solutions Inc., “BioSpec will be targeting the major manufactures and producers in the coming year to introduce the TOG's 9000™ system, and Software and methodologies for simultaneous detection and enumeration of the above microbes in various types of food samples. TOGS 9000 new model will be a method for the enumeration of total Coliforms, E.coli and Enterococci in fresh water.”

“The public have been at risk because of the inability of food companies to have fast reliable detection of the presence of E.coli in foods, BioSpec Global Solutions wants to make this type of instance a thing of the past.”

The Pro3000™ has been verified by Ryerson University, Agriculture Canada and Saskatchewan Department of Health. It has been accepted for use for drinking water analysis by EPA in the USA when used in conjunction with an EPA approved reagent The TOGS 9000 and 3000 have been used in a research project by the World Health Organization in Hawaii and by OCETA in India.

The company holds worldwide patents on the TOGS 3000 and 9000.
