BioSpec Global Solutions Inc., announces new TOG'S 1500 which combines both the TOG'S 3000 and 9000 technology.

New York, Montreal , November 19,2009 BioSpec Global Solutions Inc., and partner –ICBS Ltd. (OTCPK: [ICBT](#)), announced today a new TOG'S 1500 which will combine the technology of the 3000 and 9000 This new equipment will allow expansion into the development of a method for pharmaceutical process water testing along with food testing.

Developing methods for TOGS 1500 to analyze total bacterial count in water samples. Application in pharmaceutical process water testing. The development include the building of new hardware and optical system. Software and methodologies for simultaneous detection and enumeration of Pharmaceutical water used in processing and manufacturing .

“Moving forward with this new TOG'S 1500 will allow the company to develop a wide range of testing procedures for the Pharmaceutical industry.” Said Don Saunders President and CEO BioSpec Global Solutions. “Without constant and proper testing there is always a health concern as water, whether it be drinking water or pharmaceutical grade water can become contaminated.

Having the ability to test water efficiently and quickly can provide pharmaceutical companies with the ability to monitor their production systems.

The company holds worldwide patents on the TOGS 3000 and 9000 and 1500.
